

KEVIN MAHENDRA

Full Stack Developer

Samarinda, Indonesia | kevinmahendra.idn@gmail.com | +62 812 3955 3510
kevinmahendra.vercel.app | github.com/thekevinkun | linkedin.com/in/kevinmahendra1997

Summary

Full Stack Developer building production-ready web applications with a focus on AI-powered features, real-time systems, secure payment integration, and multi-tenant SaaS architecture. Experienced in backend reliability, including webhook validation, idempotency, refresh token handling, tenant isolation, and role-based access control. Skilled in Next.js, TypeScript, PostgreSQL, Supabase, and modern backend technologies for scalable applications.

Technical Skills

Frontend: Next.js, React, TypeScript, Tailwind CSS

Backend: Node.js, PostgreSQL, Supabase, Neon, Redis, Prisma ORM, Drizzle ORM

AI: OpenAI API, Claude API, RAG, Vector Search, Embeddings, SSE Streaming

Infrastructure: Linux, REST APIs, Docker, AWS S3, Stripe, Midtrans, GitHub Actions (CI/CD), Vitest, Playwright

Projects

Kundesk

kundesk.vercel.app | github.com/thekevinkun/kundesk

- Built a multi-tenant SaaS platform enabling businesses to deploy document-trained AI assistants that answer customer questions through public chat links, embeddable widgets, and QR codes
- Implemented **KUN**, a document-trained AI assistant powered by RAG, OpenAI embeddings, pgvector search, and SSE streaming, with real-time human handoff between AI and support staff
- Engineered backend infrastructure with tenant isolation, webhooks, rate limiting, and automated tests

Padel Court

padelbatualampermai.vercel.app | github.com/thekevinkun/padel-court

- Built a real-time booking platform with a live admin dashboard and automated booking management
- Developed real-time booking availability, scheduling workflows, and payment processing logic
- Secured payment flow with webhook signature validation, idempotency keys, and Redis rate limiting

Kun Bookshop

kunbookshop.up.railway.app | github.com/thekevinkun/kun-bookshop

- MERN full-stack digital bookstore with Stripe payments, secure downloads, and Dockerized deployment
- Implemented JWT auth, refresh token rotation, and protected file access (signed URLs)
- Integrated **KUN** as an AI assistant with OpenAI tool calling, SSE streaming, and real-time management

Experience

Independent Full Stack Developer — Remote

2021 – Present

- Built full-stack applications with AI, payments, real-time features, and multi-tenant SaaS architecture
- Engineered backend systems with webhooks, JWT auth, rate limiting, and Redis caching

Education

Self-Taught Developer (Computer Science & Web Development)

2019 – Present

- Completed CS50 (Harvard) covering algorithms, data structures, and programming fundamentals
- Applied knowledge through building and deploying production-ready full-stack applications
